Project Design Phase-II Solution Requirements (Functional & Non-functional)

Date	03 October 2022
Team ID	PNT2022TMID15218
Project Name	Project – Retail Store Stock Inventory Analytics
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	User Registration	Registration through Form
		Registration through Gmail
		 Registration through LinkedIN
FR-2	User Confirmation	Confirmation via Email
		Confirmation via OTP
FR-3	User Login	Login via form
		Login via Email
FR-4	Stock Updating	Adding/Removing Stocks
		 Generating barcodes for products
FR-5	Stock Management	 Predicting Out of stock and less brought stocks
		 Periodic generation of reports using Cognos
		analytics tool
		 Notification of the product regarding out of
		stock and expiry
FR-6	Billing Management	 Fast billing through barcode
		Quick generation of invoice after tax calculation
		 Discounts based on credit points

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	 Prediction of stocks reduce out of stocks and cost Compatible with mobile and desktop
NFR-2	Security	 Authentication of users to defend against other users People without proper credentials cannot access the application
NFR-3	Reliability	 Provides Accurate Stock prediction Reduce loss for retailer Notification system for expiry and out of stock products

NFR-4	Performance	Instant invoice generation using barcode
		 Improved accuracy in sales prediction
		 Real time report generation
		 Working on large sets of data
NFR-5	Availability	Accessible by all devices
		 Suitable for all kind of retail stores
		 Real time visibility into stock levels
NFR-6	Scalability	 Many Retailers can access the application
		without any issues
		 Allows adding of new features
